

RELAY COMPETITION – EVENT SUMMARY

Team Make-up: maximum 4 students: 1 freshman, 1 freshman or sophomore, 1 freshman, sophomore or junior, 1 student from any level. Substitutions for team members, keeping the same team make-up restriction, may be made between rounds. While questions will be based on having the order of students as freshman, sophomore, junior, senior, students may sit in any order as long as the grade level restrictions for the overall team make-up are kept.

Questions: 3 rounds; 1 question per team member per round.

Note: additional rounds are available to replace rounds with upheld appeals

Time: 7 minutes per round

Format: Team members each do a problem, passing back an answer sheet with their answer and any previous answers, which will be used by the following team member to complete their problem.

Students may pass back multiple answer sheets until the last student in the row has submitted the team answer. Each student may do only one problem.

Only the last team member may stand and submit an answer. The last team member may stand and submit an answer sheet at either of the first two commands (3 minutes and 5 minutes) and must stand and submit an answer sheet at the final command (7 minutes) if an answer sheet has not already been submitted.

All battery operated calculators permitted, including CAS-type

Answers must be legible; answer sheet must not have any stray marks or symbols, only student answers. No codes may be used in recording answers.

Answer must be **exact** unless otherwise indicated in the question

Scoring: Correct answers are worth 2 points each. Bonus points are given if all four answers are correct and the answer sheet is submitted at the 3 minute mark (First Command – 5 bonus points), or at the 5 minute mark (Second Command – 3 bonus points).

Maximum score per round is 13 points; total of 39 points per team for all rounds.
